Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

NAMES AND LABELS

- Buttons do not have an accessible name
- Form elements do not have associated labels

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

NAVIGATION

- Heading elements are not in a sequentially-descending order

These are opportunities to improve keyboard navigation in your application.

BEST PRACTICES

- Document does not have a main landmark.

These items highlight common accessibility best practices.
